PROFILE

Software Engineer with 4 years of experience in building and maintaining scalable backend systems using **Java and Spring Boot** in the **BFSI domain**. Passionate about continuous learning and staying updated with emerging technologies. Committed to enhancing user experience, performance optimization, and efficient coding practices.

SKILLS

- **Backend:** Java, Spring Boot, REST APIs, Spring Data JPA, Hibernate, Kafka, Redis, Microservices
- **Frontend:** Angular, TypeScript, JavaScript, HTML, CSS
- **Database:** MySQL, Oracle, PostgreSQL
- **Tools & Cloud:** Git, Postman, Docker, AWS
- **Problem Solving:** Data Structures and Algorithms
- **Practices:** Agile, Jira, ServiceNow, Documentation

WORK EXPERIENCE

Software Engineer

LTM (LTIMINDTREE) - March 2022 - Present

- Designed, developed, and maintained **scalable backend services using Java and Spring Boot** for enterprise BFSI applications serving **1M+ active users**.
- Built and optimized RESTful APIs, improving response times by **~30%** via query tuning, **caching**, and refactoring.
- Delivered new product features aligned with client requirements, improving release timelines by **15%** through proactive collaboration and agile sprint planning.
- Debugged and resolved **100+ production incidents**, focusing on **performance optimization**, **security compliance**, and **user experience** improvements, maintaining system stability across **high-traffic** periods.
- Optimized system scalability and reliability, **sustaining 99.9% uptime** under **peak traffic** and high data volumes.
- Authored and maintained **technical and functional documentation**, reducing onboarding time by **30%** and enabling new engineers to ramp up independently within 2 weeks.

PROJECTS

Enterprise Incident Management System 🔗

- Developed a Spring Boot-based incident management application with incident **lifecycle handling**.
- Implemented authentication and **role-based** authorization using Spring Security and **JWT**.
- Integrated **Redis caching** to optimize performance for frequently accessed incident data.
- Implemented event-driven architecture using **Kafka** to publish incident creation events asynchronously.
- Built **RESTful APIs** and persisted data in MySQL using Spring Data JPA and Hibernate.
- Designed user-specific data access with **role-based filtering** (USER/ADMIN) and **pagination** support.

Real-Time Chat Application 🔗

- Developed a **real-time room-based** chat app enabling multiple users to communicate instantly using **Web-Sockets** via Socket.IO.
- Implemented dynamic room creation with **unique 6-character** codes for secure **private chat sessions**.
- Designed a **responsive front-end** with WhatsApp-style auto-expanding input and **real-time message updates**.
- Built event-driven backend logic for user connections, room joins, message broadcasting, and join/leave notifications.
- Deployed the app on a cloud platform for continuous availability and real-time **multi-client communication**.

EDUCATION

B. Tech.

Maharaja Agrasen Institute of Technology – GGSIPU, Delhi

2017-2021

XIIth - CBSE

Jawahar Navodaya Vidyalaya – Delhi - 1st

2017
